

FAST-TRACK YOUR TV EVERYWHERE STRATEGY

The Slingbox® 700U enables television service providers to quickly make an IP-enabled set-top box SlingLoaded™. With SlingLoaded technology, viewers can watch their video content in high-definition (HD) on a PC, Mac, tablet or smartphone, anywhere in the world. To make a compatible set-top box SlingLoaded, simply use the device's USB cable and connect it to the set-top box. It's that easy.

The Slingbox 700U's small size only hints at the technology inside. Not much larger than a checkbook, it sports a striking industrial design. It is powered solely by its USB connection, which eliminates the need for any other wires or connectors. In real time, the Slingbox 700U takes the incoming video from the set-top box, transcodes it and passes it back to the set-top box. The set-top box then sends the video over the internet to the SlingPlayer® on compatible devices.

From the SlingPlayer on their PC, Mac, tablet or smartphone, consumers can watch their standard-definition (SD) or HD content, wherever they are located. They can also view their program guide, change channels, pause, fast forward or rewind and set up their DVR recordings with the on-screen

virtual remote control. For added functionality, the Slingbox 700U supports the features of the intuitive SlingGuide™ service. SlingGuide's powerful browse-and-search technology speeds the discovery of existing and new programming.

For television service providers, the Slingbox 700U is the quickest way to implement your TV Everywhere strategy. Collaborate with Slingbox to add software to your existing set-top boxes in the field. With TV Everywhere, you can differentiate your company from other service providers and add value for current and potential consumers; thereby reducing churn and growing your subscriber base.

FEATURES

- Simple plug-and-play installation
- Sleek industrial design—smallest Slingbox ever developed
- Produces high-quality HD video
- Highly robust and industry-accepted content protection
- Simplified DVR content management
- Software Development Kit provided by Sling Media® for easy integration with your set-top box
- No external power supply required
- USB 2.0 compliant

PRODUCT SPECIFICATIONS

INTERFACE

USB 2.0 Type B connector

VIDEO TRANSCODING

MPEG-2/H.264 (SD and HD) to H.264 (SD and HD)

MPEG-2/H.264 (SD and HD) to VC1 (SD)

AUDIOTRANSCODING

Dolby Digital 2/5.1 to LC-AAC and WMA8

MPEG1 L2 to LC-AAC and WMA8

OPERATING CONDITIONS

Operating Temp: 0-45C (Commercial Temp)

Operating Humidity: 20% to 90% (non-condensing)

Altitude: -150 feet to 10,000 feet above sea level

REGULATORY

FCC and CE

PHYSICAL DIMENSIONS AND CHARACTERISTICS

200 mm x 100 mm x 10 mm

SUPPORTED SLINGPLAYERS

SlingPlayer for the web

SlingPlayer for mobile devices

SLINGPLAYER SYSTEM RECOMMENDATIONS

MINIMUM NETWORK BANDWIDTHS*

HD VIEWING

1.5 Mbps or higher

SD VIEWING

384 Kbps or higher

MOBILE VIEWING

250 Kbps or higher

*Speeds above refer to upload and download. Minimum upload speed from your home, minimum download speed to your internet-connected device. Higher bitrates provide better video quality.

MINIMUM PC REQUIREMENTS

HD VIEWING

Intel 2.4 GHz Core 2 Duo class processor or equivalent with 2 GB of RAM

Video acceleration support desirable on graphics card

SD VIEWING

Pentium 4 class or equivalent with 512 MB RAM

OPERATING SYSTEM

Microsoft Windows Vista or Windows 7 with latest updates

MINIMUM MAC REQUIREMENTS

HD VIEWING

Intel 2.8 GHz Core 2 Duo class processor or equivalent with 2 GB of RAM

SD VIEWING

Intel-based Mac with 1 GB of RAM

OPERATING SYSTEM

Mac OS 10.6.x (Snow Leopard) or later

BROWSER SUPPORT

Internet Explorer, Firefox, Chrome, Safari
